Raiding the Archive: Bringing Klezmer to the Masses Once Again

By Ezra Glinter

It's a truism of traditional music that in order to go forward, you have to go back. To innovate on old material, you have to know the old material in the first place. But in the case of Yiddish music, there's often not much to go back to. During the heyday of Yiddish culture in the late 19th and early 20th centuries, klezmer melodies, Yiddish theater tunes and cantorial music were popular entertainments for Jews from Warsaw to New York. But with the Holocaust in Europe and the rapid assimilation of Jewish immigrants in America, that culture went away as quickly as it had come. For musicians today who want to learn the Yiddish repertoire, finding a living link to that centuries-old musical tradition is nearly impossible.

But there is another way. Between 1898 and 1942, some 6,000 78-rpm recordings of Jewish music were produced in the United States, and some 5,000 in Europe. When Jewish musicians in the 1970s revived the Yiddish music that had largely disappeared after the Second World War, it was those recordings that they turned to. Seasoned musicians and casual listeners alike. The release of the collection by Living Traditions and JSP Records celebrates the 25th anniversary of KlezKamp, which ran in 2009 from December 20 to December 29. In keeping with the practical function of these recordings, they were incorporated into KlezKamp's many instructional workshops.

"Cantors, Klezmerim and Crooners" is not the first reissued collection of Yiddish music, but it is one of the most ambitious. For years, musicians have struggled to gain access to old Yiddish recordings. Those that weren't junked or relegated to unknown attics were mostly held in institutional collections as restricted access to academic researchers, excluding both working and amateur musicians. Even for those who could get access, using the delicate and irreplaceable 78s for casual practice was impractical, and the much-coveted tape-recorded transcriptions that existed were of poor quality and further deteriorated with each copy.

In the past few decades, however, music archivists and producers such as Sapoznik have begun remastering and releasing some of that material on CD and in other digital formats, making it available to anyone who wants it. To date, however, the bulk of the reissued material has been instrumental music, passing over equally prominent genres such as Yiddish theater and cantorial music. Additionally, much of the reissued material is repeated on several albums, leaving the vast majority of the original 78s untouched.

In both of these respects, "Cantors, Klezmerim and Crooners" represents new ground. The collection started in 2004, when Sherry Mayrent, a klezmer clarinetist and the associate director of Living Traditions, bought 100 Jewish 78s for $40 on eBay Inc. Mayrent got hooked on collecting, and now she owns more than 5,000 discs — the largest private collection of Yiddish 78s in the world. With the assistance of Sapoznik and Grammy Award-winning engineer Christopher King, Mayrent used her collection to create the new 67-track CD set.

"I had a dream that I would be able to make this stuff available," she told the Forward. "The fact is that I've never heard any Yiddish recording of any quality that I haven't learned something from." The collection encompasses a wide range of styles and genres that seem somewhat haphazard at first listen. On the first disc, an operatic performance of "Kol Nidre" by Cantor Selmar Gerini — one of the first cantors to make Jewish liturgical music in a quasi-operatic art form — is immediately followed by a performance of "Katinka" by Yiddish theater star Molly Picon. According to Sapoznik, it is precisely these juxtapositions that make this set valuable.

"It reinforces the interrelationship of one genre to another," he said. "You get a chance to hear klezmer elements in cantorial singing, or cantorial phrasings in Yiddish theater songs. There was a lot of stuff that was obvious and clear to the original consumers of these records, which is not as clear today, which is why we used this kind of sequencing." The result is a collection that is both canonical and idiosyncratic, that both serves as an introduction to the uninitiated and presents new material for those who think they've heard it all.

Tunes played by such legendary klezmer musicians as Naftule Brandwein, Dave Tarras and Abe Schwartz are presented alongside obscure and forgotten artists as the Russian Jewish Orchestra, a group whose recordings were imported from Europe by Columbia Records prior to World War I, though nothing is known about it outside of a single entry in a 1914 record catalog.

Other gems in the collection include a performance by Cantor Alter Yechiel Karniol in the zigezkitz (speaking) 19th-century cantorial style, which Sapoznik writes in his notes, is one of a few tracks that "cross the line between the commercial studio recordings they are and the field recordings they sound like." Another rarity is a recording from 1915 of writer Sholom Aleichem reading "If I Were a Rothschild."

"Reading a few lines from 'Veni Ich Bin Rothshild' he stops," Sapoznik writes, "prompting the engineer to call out 'Is that all you got?'" Ten months later Sholom Aleichem died. When his funeral attracted a staggering 500,000 people, RCA Victor hurriedly rushed out the failed test record. When it did not sell, it was soon dropped from the catalog, making the record one of the most important and rarest of all Yiddish commercial recordings.

For all the material contained on "Cantors, Klezmerim and Crooners," however, the CDs barely scratch the surface of Mayrent's collection, which is why she plans to continue to remaster the records and release them online.

A step in this process will be the recently-announced foundation of the Mayrent Institute for Yiddish Culture to be permanently located on the campus of the University of Wisconsin-Madison. Sapoznik will head the new institute, which will be dedicated to helping understand the world of Yiddish through its arts.

Exquisite music projects are also being pursued elsewhere. Florida Atlantic University's Judaica Sound Archives has been collecting Jewish music of all kinds since 2002, and provides much of it in streaming format on its Web site and more through research stations located in libraries throughout the United States, Canada, Israel and the United Kingdom. These projects, however, have to contend with copyright laws which protect any recordings made after 1923. But Sapoznik is optimistic that they will eventually be able to release all of the material, much of which is now owned by such corporations as Bertelsmann and Sony.

"I think the tide is turning," Sapoznik said. "It is sort of ironic that the Germans and Japanese own almost all the recordings made in America prior to World War II — for the American people doesn't have access to their own national sound heritage. But I'm very optimistic that this is going to change."

In the meantime, however, "Cantors, Klezmerim and Crooners" provides unprecedented access to a world and a musical tradition well worth holding onto.
